

Your helpful hand  
&  
best friend

Billy is a smart medication dispenser specifically designed for providing fun for children and making the caretaker's life easier.

## WHY BILLY?

Billy is the first smart pill dispenser designed for children to help them overcome their fear of taking medicine. Billy provides a fun way of taking medicine and gives the children the feeling that they are able to achieve something on their own. After taking their medicine children get a reward which is placed in the reward storage individually filled by the caretaker.

## WHO?

Billy specializes on children from the age of 8 to 12. Since the rewarding system is individually adaptable, the pill dispenser is also suitable for children who are younger or older than the target group.

## FEATURES

21 dosages

Right amount of pills

Safe access only at the right time

Reminder

Supervision

Individually adjustable rewarding system

Caretaker's Smart App

# SECOND

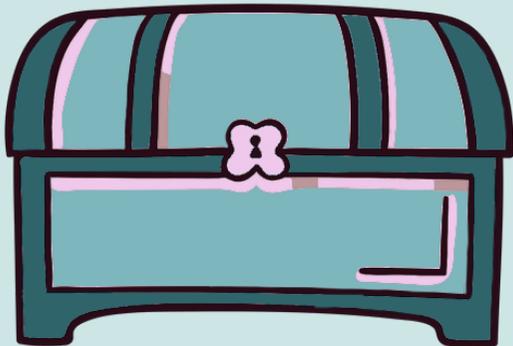

*Life for the package*

The package and the fillings secure a safe transportation for **billy** and provide a sustainable and environmentally solution. The cardboard and the fillings have a re-cycling rate up to 100 % and are biodegradable.

The cardboard is pre-cut, giving children the opportunity to build their own treasure box.

Children's first reward is a sticker for their achievement, they can place it on the box or anywhere they want to have **billy** with them.

MAKE YOUR OWN  
TREASURE BOX!

# FOLDING

*Instructions*

## STEP 1

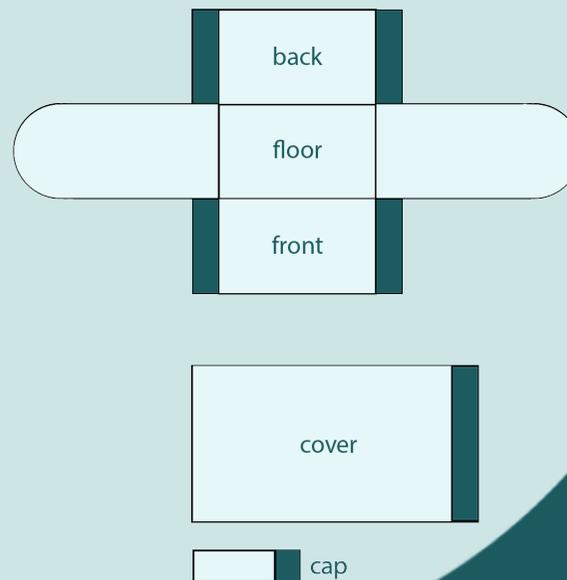

Fold the individual parts and glue them with the turquoise sticking parts which create a box.

## STEP 2

Cut a slot in the middle of the front.

## STEP 3

Glue the turquoise sticking part of the cover on the back and close it by placing the cap in the slot in the front.
